

Go to:

<http://www.natureserve.org/explorer/servlet/NatureServe>

Click on the Ecological Communities & Systems tab.

Once there, there are 3 tabs toward the top for different categories of information.

On the "**Name**" tab, do the following:

- Under "Search By Name", leave the text box blank and select the button for "Systems"
- Under "By Landfire Legend" (further down), select the button for "Only Landfire Legend"
- Under "Refine Ecological Systems Results," check the box for "Include Ecological Systems Aggregates"

On the "**Location**" tab, do the following:

Scroll down to "MRLC 2000 Map Zones" and select your zone(s) of interest. Then click on the "Search Now" button.

You will get a list of the systems displayed in a few seconds. You can just click on individual systems to read information online, or you can click the "Download Systems PDF" button (top center) to create a nicely-formatted and bookmarked PDF.
