SUBJECT: Forestry and Related Natural Resources Multidisciplinary
Group Meeting

Please find attached your copy of the minutes of the above meeting held June 1, 1983.

I would like to thank you for your most useful contributions. We made a very good start.

I shall contact those persons who were suggested for the elements of the analysis that were underrepresented, then, I believe, we will have a cadre of individuals who can maintain surveillance over all aspects of work related to the 17 elements of the industry analysis.

I also believe such a group is needed and that it can make considerable contributions to forestry and related natural resources in this state.

Thank you again and we shall keep in touch.

FORESTRY & WILDLIFE
STATE OF HAWAII

'83 JUN-9 P1:13

RECEIVED

SUBJECT: Forestry and Related Natural Resources Multidisciplinary Group

Please find enclosed a copy of the Analysis and Action Plan of "Forestry and Related Natural Resources" conducted in 1980-81.

A small multidisciplinary group met on June 1, 1983 at my invitation to review the work in progress within the 17 elements of the Analysis. A copy of the minutes of that meeting are also enclosed.

You will see that a number of areas were not well represented and your name was suggested as someone who could make significant contributions to the group's activities. These activities are briefly described in my original memo dated April 27, 1983 which is also enclosed. It is my pleasure to invite you to membership.

The group is not a policy making body as that responsibility lies with the appropriate federal and state agencies. It is the purpose of the group to identify research and extension needs related to forestry and related natural resources within the state and to serve in a coordinating and information exchange role.

I would be pleased to have your response to this invitation. We should have our second meeting as soon as we can fix a date suitable to the majority.

Thank you.
